

Ultra RFID Wristbands

Ideal for Cashless & Visitor Management Solutions

Manage, control, simplify with Ultra RFID Wristbands for use with RFID integrated systems in applications such as admissions, lockers, payment and security.

You can record, track, and validate ANY amount of customer data all on one tiny waterproof chip that your customers can wear on their wrist! Ultra RFID Wristbands are durable, comfortable and made of a strong lightweight waterproof vinyl and Hi-Res material.

- One-time use or multi-day use wristbands with cashless automation systems
- Each wristband contains an imbedded standard antenna with a readable/writable chip to store valuable and unique customer or employee information
- Ultra RFID Wristbands can be read from a distance, without contact or line of sight
- Eliminate employee theft of cash at the point of sale
- Consecutive numbering and bar coding available

Ultra RFID Hi-Res Wristbands with adhesive closure

Made of strong, ultra-soft lightweight material, Ultra Hi-Res wristbands are comfortable, durable, tear-resistant, waterproof and easily applied to any size wrist with an adhesive strip. This option can be custom printed with highly visible, sharp and colorful graphics for any special event where a standard wristband won't do. Our Hi-Res wristbands offer the same type of security as traditional wristbands. With a series of die-cuts at the point of adhesion, it makes these wristbands virtually tamper resistant.

Ultra RFID Vinyl Wristbands with Snap Closure

This option is ideal for longer use applications as it is secured with a permanent snap closure and is waterproof. It is also resistant to stretching and can be printed with your custom logo or other text, images and numbers. Available in multiple colors.
